EXPERIENCE

ML INTERN | Gnani.ai

June 2024 – July 2024 | Karnataka, Bangalore, India

- I worked as an ml intern in the company.
- As it is a startup I got to meet extraordinary talented peoples as my colleagues.
- I learned to make generative A.I. voice bots on the company's framework.
- I got to know that how the industry works and what all new skills I need to acquire?

PROJECTS

CAR SHOWROOM MANAGEMENT SYSTEM | DEVELOPER

Jan. 2022 – Feb. 2022

- Volunteer: Research and Development (R&D).
- Contributed in developing and researching the management system using python as the programming language. The database was created using MySQL.
- Showcased the same in a school level event along with other schools as competitors.

COCONUT DISEASE CLASSIFICATION MODEL |

RESEARCHER

Feb. 2024 – May 2024

- Me along with my team compared many machine learning projects which classifies the 7 diseases in the coconut fruit.
- The Efficientnet-B0 was the model which gave an accuracy of 99.61%.
- We are even preparing a research paper on the same as this much accuracy is not attained by anybody else.

AI CHATBOT INTEGRATED WITH WHATSAPP | DEVELOPER

May 2024 – June 2024

- The chatbot is created using rasa and I have integrated WhatsApp using Twilio.
- The chatbot is able to give a dynamic response to the user by taking the data from the database stored in MongoDB.
- Trying to improve the chatbot by integrating the calling function along with the bot.

CERTIFICATIONS

INDUSTRIAL IOT MARKETS AND SECURITY

Dec. 2023 – Jan. 2024

- I did this certification course on the corsera platform along with all its assignments and exams.
